

2. TYPOGRAPHY

GIREAPP uses two typefaces: Plus Jakarta Sans for all headings and Plus Jakarta Sans Bold for emphasis, and Inter for all body content. Both are available free on Google Fonts. Never introduce a third typeface. All sizing follows the 8pt grid system, never below 12px.

How it works

For Desktop

- H1** · Plus Jakarta Sans Bold · 28px · Screen titles
- H2** · Plus Jakarta Sans Bold · 20px · Section headings
- H3** · Plus Jakarta Sans Medium · 16px · Card titles
- Body Inter Regular · 16px · Paragraphs
- Subtitle Inter Regular · 14px · Supporting labels
- Caption Inter Regular · 12px ·

For Mobile

- H1** · Plus Jakarta Sans Bold · 20px · Screen titles
- H2** · Plus Jakarta Sans Bold · 16px · Section headings
- H3** · Plus Jakarta Sans Medium · 16px · Card titles
- Body Inter Regular · 16px · Paragraphs
- Subtitle Inter Regular · 14px · Supporting labels
- Caption Inter Regular · 12px ·

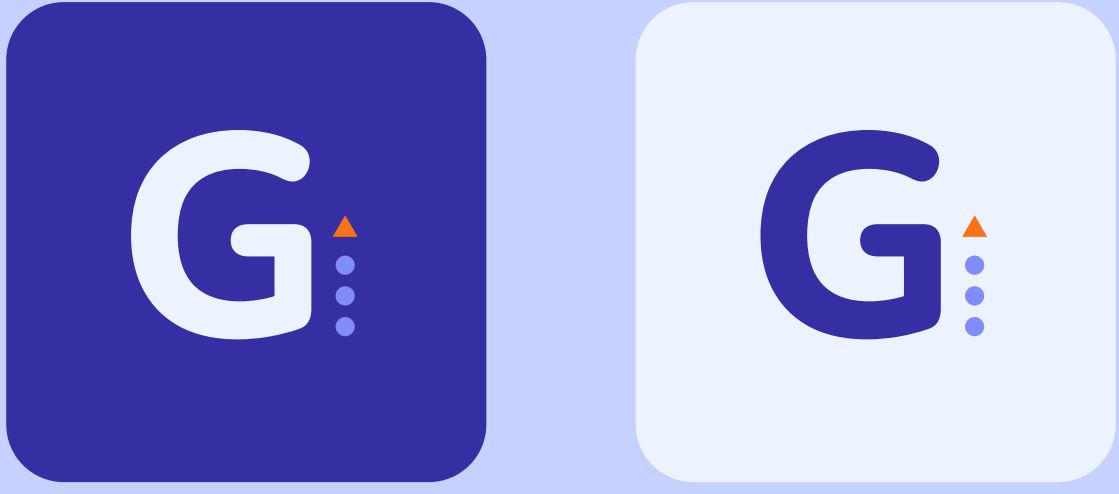

Metadata Rule: one H1 per screen. Never skip levels.

3. LOGO, ICON AND FAVICON

The GIREAPP **logo** is a combination mark - an icon and a wordmark used together. The icon is a chip inside an open book shape, representing the union of technology and learning. The wordmark is set in Plus Jakarta Sans Bold. Both elements must always appear together except in favicon and app icon contexts where the icon mark is used alone.

Versions:

- Primary Dark - on light backgrounds
- Primary Light - on dark backgrounds
- Icon Only - favicon & app icon contexts

The GIREAPP **app icon** and **favicon** is the full icon: chip inside open book with coral accents on indigo background. Used for the splash screen, onboarding, and app store listings. This system ensures the brand is recognizable across every platform and size, from a 16px browser tab to a 180px iPhone home screen.

Variants:

- The full icon for large sizes (48px+)
- The simplified icon for favicons (16–48px).
